Career Summary

Accomplished manager with a track record of over 8 years in investment analysis and portfolio management, adeptly leading a team to handle diverse responsibilities including investment research, market analysis, financial modeling, due diligence, investment appraisal, risk assessment, and portfolio management. An effective communicator and collaborator, backed by a Master of Science in Finance, poised to drive success through strategic management and leadership.

Core Competencies

- Expertise in investment research, market analysis, Financial Modeling, and due diligence.
- Proven track record of advising SMEs on business operations and optimizing their models.
- Strong research and analytical skills with the ability to forecast market trends.
- Experienced in evaluating financial performance and providing recommendations.
- In-depth knowledge and hands-on experience in small and medium enterprise investments.

Work Experience

Accelerate Prosperity, Pakistan

Deputy Chief Investment Officer,

August 2025 - Present

In my role as Deputy Chief Investment Officer, my primary responsibility is to support the Chief Investment Officer in driving the organization's investment strategy and ensuring effective execution across the portfolio. I work closely with the CIO to strengthen investment processes, manage risk, enhance portfolio performance, and lead the investment team in alignment with the institution's financial and impact objectives.

Key Responsibilities:

- Support the CIO in developing and implementing the overall investment strategy across regions and sectors.
- Assist in overseeing the end to end due diligence process to ensure thorough financial, operational, and impact assessment.
- Review Information memorandum (IM) financial models (FM) and Due Diligence reports before submission to the CIO and Investment Committee.
- Support the CIO in delivering AP's mandate by aligning investments with strategic, financial, and impact objectives.

Accelerate Prosperity, Pakistan

Investment Manager KP and Gilgit Baltistan,

August 2024 - Present

In my current role as Manager of Investment for Khyber Pakhtunkhwa and Gilgit-Baltistan at Accelerate Prosperity (AP), I am responsible for the comprehensive management of the regional investment portfolio. This role encompasses supervising the due diligence process, developing investment strategies, and supporting high-potential businesses through various stages of investment and growth.

Key Responsibilities:

- Managing the regional investment analyst team and supervising the preparation and review of investment documents.
- Lead and supervise the team's due diligence process for evaluating potential investments.
- Oversee financial modeling to assess the viability and risk of investment opportunities.
- Conduct risk analysis to identify and mitigate potential challenges.
- Develop comprehensive Information Memorandum for structuring investments, grants, or technical assistance.
- Ensure the proper preparation of all necessary documentation for Accelerate Prosperity and External investors.
- Presenting investment cases to AP's Investment Committee for evaluation and approval.
- Collaborate closely with the Technical Assistance team to identify and select high-potential businesses for cohort induction and graduation.
- Play a key role in shortlisting businesses that align with AP's investment goals and growth potential.
- Lead the development of a strong investment pipeline by sourcing and identifying promising deals.
- Support the creation of a steady flow of investment-ready businesses for future opportunities.

Leading and managing a regional team at Accelerate Prosperity, I oversee acceleration and incubation programs. My involvement spans program design, stakeholder engagement, and implementing impactful business initiatives. Handling investment portfolio management, I facilitate donor visits and collaborate with AKDN agencies and government institutions. The primary focus is on fostering an inclusive institutional environment, promoting economic sustainability, and driving social impact in the region.

Key Responsibilities:

- Leading the design of program structures to ensure comprehensive coverage of all aspects.
- Managing stakeholder relationships and facilitating effective communication.
- Mobilizing communities and stakeholders to encourage engagement and support for program initiatives.
- Managing the investment analyst team to provide business advisory training, focusing on business modeling, information memorandum (IM) development, financial modeling (FM), and pitch deck creation.
- Overseeing the investment team's thorough Due Diligence, financial modeling, risk analysis, and creating financial feasibility assessments for equity investments, guarantees, grants, and technical assistance.
- Facilitating donor visits and liaising with other AKDN agencies and government institutions.

Developed a portfolio of impactful SGBs by identifying market opportunities and coachable, relevant entrepreneurs possessing strong entrepreneurial skills and basic business plans. Provided guidance and advice to make these businesses investment-ready, to foster environmental, economic, and social impact. Facilitated connections between impactful businesses and potential investors, including institutional and angel investors.

Key Responsibilities:

- Source strategic businesses aligned with AP's and impact investors' preferences, focusing on climate-friendly innovative businesses.
- Advise and reengineer SGBs operations to enhance scalability and impact, making them investment-ready for AP and impact investors.
- Engage and liaise with subject matter experts for technical advice on SGBs and conduct subject-related due diligence.
- Prepare documents for AP's investment committee and other potential investors.
- Present business cases to AP's investment committee for final investment approval.
- Provide post-investment advisory to businesses, ensuring optimal fund utilization and promoting practices that are climate-friendly, economically sound, and socially responsible.

Developed and managed a portfolio of SGBs, involving pre and post-investment advisory, redesigning business models, developing Information Memorandum, creating Financial models, facilitating pitch sessions, and conducting due diligence. Assisted startups in raising funds from both local and international investors. Provided continuous mentoring support across their entire investment journey, focusing on cultivating expansion, unlocking potential, and emphasizing environmental impact, economic returns, and social impact.

Key Responsibilities:

- Evaluate potential investments in impactful startups and SMEs.
- Conduct training sessions for businesses, covering business modeling, IM development, FM, and pitch deck creation.
- Perform thorough Due Diligence, considering environmental impacts, technical analysis, business analysis, risk analysis, and creating financial feasibility assessments for various funding mechanisms.
- Collaborate with government and non-governmental agencies to ensure compliance with climate-friendly regulatory requirements in investment proposals.
- Maintain regular oversight of investments and optimize fund utilization.
- Provide pre and post-investment training and advisory services based on term sheet recommendations and due diligence findings.
- Create informative materials for internal and external stakeholders, highlighting AP's investment strategy, criteria, and success stories.

Executed diverse assignments delegated by senior management, encompassing business risk and transaction advisory services. Played a key role in formulating business strategy, providing training, and offering advisory services to businesses and startups for both Government and Non-Government Organizations, including Accelerate Prosperity, Karandaz, Pakistan Microfinance Network (PMN), and National Incubation Centres. Possess practical experience in developing policies and procedures for financial institutions.

Key Responsibilities

- Executed the mandate, which involves 100 business models, market research and analysis, and financial planning.
- Analyzed financial data – and created financial models for decision support.
- Prepared balance sheet, income statement, and changes in financial position/budget variance analysis.
- Developed training content that contains case studies, templates, and formats exercises and their solutions.
- Developed organizational policy and procedure manuals.
- Prepared tax and legal documents for FBR, SECP, and other government institutions.

Sarhad University of Sciences and Information Technology (SUIT), Peshawar
