PROFILE

As a Senior Full Stack Developer, I have achieved professional growth, dynamic work experience, and advanced technical expertise by serving in private, development, and government sectors, effectively aligning my knowledge with the offered roles and opportunities. I have specialized in building scalable web applications and management information systems, implementing end-to-end development by efficiently utilizing web technologies, programming frameworks, and modern database management systems. These include backend and front-end technological frameworks such as ASP.NET MVC, Laravel, CodeIgniter, Symfony, Yii, WordPress, JavaScript, Node.js, and Bootstrap, as well as databases like MySQL, Microsoft SQL Server, and PostgreSQL. In addition, I have developed essential proficiency in leading projects, delivering data-driven solutions, and ensuring high-performance systems by making efficient use of cross-platform servers and cloud-based services.

SKILLS

Programming Languages: Python, C#, PHP, C, C++, JAVA

Web Frameworks: Laravel, Yii, ASP .NET, Symfony, CodeIgniter, Django, Flask, WordPress

Frontend Technologies: HTML5, CSS3, Bootstrap, JavaScript, jQuery

Databases: Microsoft SQL Server, MySQL, PostgreSQL, Oracle

Version Control: Git, GitHub / GitLab

CI/CD & DevOps: CI/CD Pipelines, GitHub Actions / GitLab CI, Jenkins (basic)

Web & API Technologies: RESTful APIs, AJAX, JSON

Servers & Deployment: Apache, Nginx, Linux (basic)

Survey Tools: Open Data Kit (ODK), Kobo Toolbox, Survey to Go

Server Management: Windows Server 2014, Window Server 2016

Other Tools: Docker, Composer, npm

EXPERIENCE

Full-Stack Developer, Information Technology Department Government of Gilgit-Baltisan

Oct 2022–Present

Support e-governance initiatives to automate and digitize government departments in Gilgit-Baltistan by leading the design, development, and implementation of end-to-end web applications, ensuring scalable front-end and back-end architectures using technologies such as ASP.NET MVC, Laravel, and the latest JavaScript frameworks. Design, optimize and manage databases such as MySQL, Microsoft SQL Server, PostgreSQL to facilitate a uniform, efficient and reliable data flow across these applications. Guide the team, coordinate with stakeholders, manage deployments and maintenance, and adhere to best practices in the software development lifecycle.

Management Information Systems Officer (PINS ER3), Rural Support Programmes Network

Feb 2018–Oct 2022

Designed, developed, deployed, and maintained an end-to-end web-based management information system to track the programme activities in real time using modern backend and front-end frameworks such as ASP.NET MVC and jQuery. Managed data flow by designing and optimizing the database utilizing the latest Database Management Systems such as Microsoft SQL Server. Used the Highcharts library to design an interactive and real-time progress monitoring dashboard for key performance indicators. Organized, conducted, and led in providing technical training for the programme team, organization, and key stakeholders.

Xamp/Wamp Web Developer, Medialinkers

Feb 2016–April 2017

Developed web applications in PHP using the CodeIgniter framework, MySQL database, jQuery, and Bootstrap. Gathered requirements and created customized websites for clients using content management systems such as WordPress.

Software Executive Engineer, Cogilent Solutions

Oct 2015–Jan 2016

TRAININGS

ODK Surveys: Survey data collection trainings in Open Data Kit (ODK) for staff.

Google Career Certifications: Register, enroll and manage learners in Coursera.

MIS Trainings: Management Information System (MIS) related trainings for staff

Data Entry & Management: Capacity building of staff on online data entry, data visualization and extraction.

CERTIFICATIONS

Microsoft SQL Server Database Administration

Python Developer Certification

Data Science with Python

Foundations: Data, Data, Everywhere

Ask Questions to Make Data-Driven Decisions

Prepare Data for Exploration

EDUCATION

Mirpur University of Science and Technology, B.Sc. Computer System Engineering
2009-2013

Computer networks and programming. (CGPA 3.76/4.00).

Planned, Designed and implemented web-based portals in Symphony MVC PHP Framework and PostgreSQL database. Utilized Bitbucket for a cloud-based storage, management, and collaboration of code.

Junior Software Engineer, Electronic Solutions Islamabad

Nov 2014–Oct 2015

Designed, developed, deployed and maintained websites and applications in Core PHP, JQuery, HTML and CSS by using XAMPP cross-platform web server.

Web Developer Internee, UEXEL Pakistan

Jan 2014–Oct 2014

Learned core web fundamentals and implemented the concepts on live projects productively. Built and delivered a real client application by using the Yii Framework, Bootstrap, Javascript Library and MySQL Database.

FLAGSHIP PROJECTS

Lease Management Information System, Mines & Minerals Department Government of Gilgit-Baltistan

Technology Stack: PHP – Laravel Framework – JQuery – Open Street Map – HighCharts – Bootstrap – MySQL

Link: <https://portal.minesandmineralsgb.gog.pk/>

Management Information System, Health Endowment Fund Government of Gilgit-Baltistan

Technology Stack: C# – ASP.NET Core MVC – Highcharts – Microsoft SQL Server

Link: <https://www.cmhealthendowmentfund.gog.pk/>

Management Information System, Programme for Improved Nutrition in Sindh(PINS)

Technology Stack: C# – ASP.NET Core MVC – Highcharts – Microsoft SQL Server

Link: <https://rspn.org:8000/>

Web Portal, Gilgit Baltistan House Islamabad

Technology Stack: PHP – Laravel – HighCharts – MySQL - Bootstrap

Link: <https://gbhouse.gilgitbaltistan.gov.pk/>

Zakat Management Information System, Zakat & Ushr Department Gilgit Baltistan

Technology Stack: PHP – Laravel – HighCharts – MySQL – Bootstrap

Link: <https://zakat.gbit.gov.pk/>
